

Material Safety Datasheet

Section I – Product Identification

DESCRIPTION: MESH
MATERIAL: 100% Polyester

Section II – Hazardous Ingredient

None

Section III – Fire and Explosive Hazards

Fabrics can be combustible. Use water, carbon dioxide, or dry chemical to extinguish fires. Use normal firefighting procedures, including positive –pressure self-contained breathing apparatus and full firefighting protection clothing.

Section IV – Health Hazard Information

This fabric is not expected to create any unusual hazards when handled and processed according to good industrial hygiene and manufacturing practices. Mechanical irritation effects from dust exposure are possible at ambient temperature.

Section V – Exposure Control Methods

Use only with adequate ventilation. Avoid dust generation. Wear safety glasses when Cutting or where airborne dust is present.

Section VI – Waste Disposal

Landfill disposal of waste fabric may be made in accordance with local governmental regulations.
