**PSYCH-CARE TRACKS**

Cube Care  
EXPECT EXCELLENCE

### Psych-Care Tracks

### PRODUCT DETAILS

The Cube Care Psychcare Track System is a lightweight and durable extruded aluminum system that is intended for use in Psychiatric Wards where patient safety is a concern. It differs from our other track systems in that it is equipped with special plastic "Pop-out" carriers that disengage when more than 10lbs of pressure are applied. It is also necessary to use special Tamper-resistant screws when installing Psychiatric Track.

Psychcare Track is available for purchase in individual pieces or in a Kit which includes 2.5 Pop-Out carriers per linear foot, as well as any End Caps, Pull outs, and Splices that you need. We offer special bends in 90 degrees and 45 degrees which can be combined with our straight track to create many different configurations.

### COLORS

We are offering the following selections

Clear Anodized Aluminum

White Enamel

### PsychCare Tracks

### PARTS AND COMPONENTS
